Note: next injection was due on or about 10/18/2022; patient deferred at that time and the medication was subsequently discontinued (see note of 01/05/2023).

Office Visit — Contraceptive Initiation — 04/13/2021

Subjective: 30-year-old female presents to establish injectable contraception. Prior combined oral contraceptive use without complication. No current headaches, no visual complaints. Denies tobacco use.

Objective: BP 116/72, HR 74, BMI 24.8. Urine hCG negative today. Exam unremarkable.

Assessment: Encounter for initiation of injectable contraceptive (Z30.013).

Plan: Counseled on risks/benefits/alternatives of medroxyprogesterone acetate injectable suspension, including irregular bleeding, weight change, and bone mineral density considerations. Consent signed. Depo-Provera 150 mg/mL administered IM left deltoid today, lot KJ4471. Return in 12–13 weeks for repeat injection.

Electronically signed: Alan Reyes, MD — 04/13/2021

Office Visit — Injection Follow-up (Visit 5) — 04/12/2022

Subjective: Returns for scheduled contraceptive injection. Reports lighter menses, tolerating well. No new complaints today. Denies headache at this visit. Denies chest pain, denies shortness of breath.

Objective: BP 120/78, HR 76, Weight 152 lb.

Assessment: Encounter for surveillance of injectable contraceptive (Z30.42).

Plan: Depo-Provera 150 mg/mL IM administered left deltoid, lot NP7719. Next injection due week of 07/18/2022.

Electronically signed: Alan Reyes, MD — 04/12/2022

Office Visit — Injection Follow-up (Visit 6) — 07/19/2022

Subjective: Returns for scheduled injection. Mentions occasional mild headaches over the past month, attributed to work stress; not currently symptomatic. No visual complaints reported at this visit.

Objective: BP 122/80, HR 78.

Assessment: Encounter for surveillance of injectable contraceptive (Z30.42). Headache, intermittent — advised to follow with PCP if persistent.

Plan: Depo-Provera 150 mg/mL IM administered right deltoid, lot NP7719. Next injection due on or about 10/18/2022. Patient advised to report worsening headache or any visual changes.

Electronically signed: Alan Reyes, MD — 07/19/2022

Telephone Encounter — 10/14/2022

Patient called to defer injection scheduled for week of 10/18/2022. Reports ongoing headaches under evaluation by primary care. Advised acceptable to defer; discussed backup contraception. Will re-address at next contact.

Message routed to Dr. Reyes; reviewed and agreed.

Electronically signed: M. Ortiz, RN / co-signed A. Reyes, MD — 10/14/2022

Office Visit — Medication Review and Discontinuation — 01/05/2023

Subjective: Patient returns to review contraceptive plan. Since last injection she has been diagnosed with **idiopathic intracranial hypertension (G93.2)** by Dr. Priya Natarajan, Springfield Neurology Group, following **lumbar puncture** on 12/16/2022 (opening pressure 32 cm H2O per outside record). Currently taking **acetazolamide** 500 mg BID. Ongoing **headaches**, improving; **transient visual obscurations** resolved per patient.

Assessment/Plan: In light of neurology's recommendation, **Depo-Provera is discontinued as of today**. Last dose administered 07/19/2022. Reviewed non-hormonal contraceptive options; patient elects copper IUD consult. Records of injection history to be forwarded to neurology on request. Return PRN.

Patient questions answered; verbalized understanding.

Electronically signed: Alan Reyes, MD — 01/05/2023
